

BASALITE® PROJECT EXPERIENCE - PERMEABLE PAVERS

LARKSPUR BUSINESS COMPLEX - MONTEREY, CA

When Rhodes Architects of Monterey, California designed the parking lot for their headquarters at the Larkspur Business Complex, they specified Basalite's SF Rima permeable pavers. Approximately 10,000 square feet of the permeable pavers were installed by Stowe Contracting in the summer of 2008.

Over the last few years, the SF Rima pavers have performed admirably and continue to allow the storm water to pass through the joint material and be treated below.
