

BASALITE® PROJECT EXPERIENCE - PERMEABLE PAVERS

OLD TOWN PLAZA, PITTSBURG, CA

Located in Pittsburg, the Old Town Plaza pavilion is used for public gatherings, special events, and the farmer's market. Approximately 7,500 sf of permeable pavers manufactured by Basalite were installed by European Paving Designs of San Jose. SF-Rima, Artisan Slate Permeable and Mission Permeable Pavers were chosen by landscape architect Hansen McArdle Inc., to support the recharging of the groundwater and irrigation of the trees. Installed in the summer of 2010, the project is now a centerpiece for the City of Pittsburg.

Ron Nevels, P.E., Senior Civil Engineer, City of Pittsburg
