

BASALITE® PROJECT EXPERIENCE - PERMEABLE PAVERS

PAVERS PLUS, INC. - RENO, NV

Pavers Plus, Inc., of Reno, Nevada installed approximately 4,000 sq.ft of permeable pavers manufactured by Basalite. The installation was one of the first permeable paver projects in Northern Nevada. SF Rima Permeable Pavers were the choice of owners Mike Cate & John Garrett, to showcase the low-impact approach to paving. Installed in 2005, this beautiful permeable paver parking lot has endured hundreds of freeze thaw cycles and continues to effectively drain storm water and recharge the groundwater.
