AB Metro Patio Wall System

Rooms for Socializing and Entertaining

This space has everything you need to sit around, share a meal, watch a game with drink in hand, and create memories with your guests.

Outdoor Living at its Best

Open-Air Family Rooms

Using the flexibility of the AB Metro Patio Walls System, form can follow function. Find a way to add that extra space to relax, entertain and enjoy a new outdoor living space.

Functional & Relaxing Spaces

Spacious Kitchens

We all know that our kitchen is the center of our home for both family and friends. Now expand your options and quality of life by adding everything you have ever dreamed of. Your new outdoor kitchen using the AB Metro Patio Wall will be the cornerstone for your new home addition.

What is AB Metro Patio Wall?

A contemporary patio wall system with straight lines and a smooth face for a style that will look great for years.

Using the modular building blocks from the AB Metro Patio Wall System, create the look that fits your lifestyle in an outdoor addition to your home.

Garden and Landscaping

Simplify your life by making it easy to use and maintain your outdoor space. Add neat and tidy planters, stunning entryways, or convenient to use raised gardens.

Simple Installation

The AB Metro Patio Wall System

This is a modular system using three blocks in three sizes, AB Metro 8, AB Metro 16 and AB Metro 24, that is packaged as a set, so you can create endless outdoor designs in beautiful patterns. Create smooth, easy to build, straight walls, with seamless 90-degree corners that fits together without any modifications to the blocks. Stack - Glue - Done.

Installing AB Metro Patio Wall System on Existing Surface

- Mark the location of the wall and using the 1-2-3 Magic Pattern, install the first course. Adjust and shim with asphalt shingles as needed, check for level as you go. Clean off the top of the blocks, then apply a generous bead of flexible construction adhesive on the top of the blocks, running down both sides of the core.
- Install second course with a 1 core unit centered on a 3 core unit to start the Magic 1-2-3 Pattern. Adjust and level to ensure the blocks are plumb as you stack vertically. Use the flexible construction adhesive to bond and as a leveling agent. Continue using these steps with the 1-2-3 Magic Pattern to top of wall. Remember to check for level and plumb, place flexible construction adhesive on every course and to incorporate columns and corners for stability.
- Install AB Metro Patio Wall Cappers or countertops as designed for a clean, finished look. Secure in place with flexible construction.

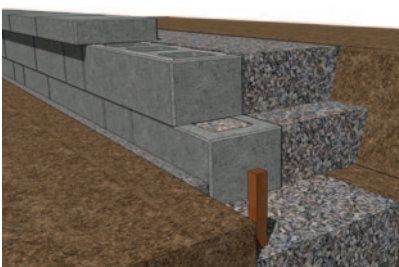

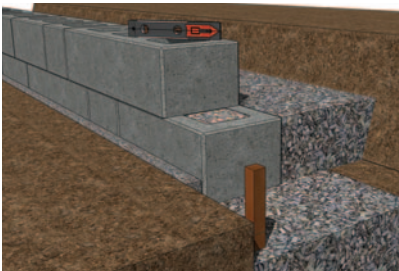

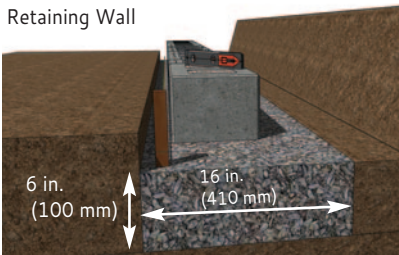

AB Metro Capper

See allanblock.com for complete details and pre-designed element layouts.

Installing AB Metro Patio Wall System - Garden/Landscape Wall*

Retaining Wall

- Mark the location and remove surface vegetation. Dig a base trench up to 8 in. (200 mm) deep and 16 in. (410 mm) wide. Install wall rock, level and compact the entire trench with a hand tamper. Bury a minimum of 3 in. (75 mm) of the first course.
- Using the 1-2-3 Magic Pattern, install the first course starting with the 3 core unit followed by the 2 and 1 core on the wall rock foundation by leveling and tapping into place with a rubber mallet as you go. A level base course ensures a quality finished wall.
- Fill the block cores and backfill behind 12 in. (300 mm) with wall rock. Carefully compact to lock them in place. Sweep the blocks clean, check and adjust for level. Then apply a generous bead of flexible construction adhesive on the top of the block, running down both sides of the core.
- Place the second course starting with a 1 core unit centered on a 3 core unit to start the Magic 1-2-3 Pattern. Fill the block cores and backfill behind with wall rock. Sweep and check the blocks for level, adjust as needed. Add flexible construction adhesive to adhere the courses together. Install additional courses as designed with same process.
- Install AB Metro Patio Wall Cappers for a clean, finished look. Secure in place with flexible construction adhesive.

*If building on soil, see allanblock.com for complete details.

Estimating Tool

Completing a proper estimate is one of the most time-consuming tasks anyone must deal with. Having an accurate estimate can make or break a project. Fortunately, Allan Block has provided a solution to this task.

Using the step-by-step guides with our AB Estimating Tool, you have the ability to create a detailed material estimate for any Allan Block product. This includes Allan Block retaining wall products, AB Fence, AB Courtyard and now the AB Metro Patio Wall. Simply enter the project details and you can receive information and estimates to show exactly what you need to build your project.

Customized Pricing Tool

Understanding the costs associated with any project leads to proper communication and success. The Metro Patio Wall Pricing Tool can give you break down pricing for each Element or Pre-Designed Room, as well as a full project pricing summary. It does this using local costs you assign for the materials. Using the AB Metro Design App to design your project, you will have the ability to use this tool to create a full pricing proposal summary.
